The global Silicone Elastomers market was valued at 500.21 Million USD in 2021 and will grow with a CAGR of 6.19% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Silicones or polysiloxanes consist of alternating silicone-oxygen backbone, an aromatic group. This made a versatile silicone based-polymer. It is generally classified into elastomer, resins, or fluids based on their molecular weight. Silicone elastomers are mainly cross-linked and need to be vulcanized. They come in different forms, such as open cell foams, solids, thermally conductive, and cell sponges. Currently, Asia-Pacific is the largest silicone elastomers market, in terms of both volume and value, followed by Europe. Countries such as China, the U.S., and Germany are the major silicone elastomers markets. The growing automobile manufacturers in China and foreign direct investment in the country is increasing the demand of silicone elastomers. Developing countries in Asia-Pacific, especially China and Japan, have also emerged as the key markets for silicone elastomers.
