Sizing agents are substances that are commonly applied to fibers to reduce their porosity and make them suitable for printing. Thickening agents improve the viscosity of fluids without changing other properties. They are commonly used by the F&B industry to increase the viscosity of liquids. Based on the product type, the thickening agents segment will account for the maximum share of the market during the next few years. The increasing demand for mineral and hydrocolloid thickening agents in F&B, paper and paperboard, and paints and coatings will be a major factor driving the market's growth in this segment.
