Soon all smart drones will have computer driven collision avoidance technology making the flying more reliable. Remote operation occurs in the context of a workflow and sensors. Cameras are improving dramatically to permit management of video and picture taking that is realistic and detailed. Smart commercial drones are used for commercial application such as agriculture, government and entertainment. The Smart Drone Services industry concentration is relative high; there are many producers in this market, but DJI only take above 60% market share. DJI focus on micro and mini products, its product mark a strong growth rate, even there are more and more new players entered into this market. Its market leadership is relatively stable due to the product performance and incomparable prices.
