The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Smart Formaldehyde Detector is used to measure Formaldehyde content in air. This report mainly covers the portable and stationary product types, while we can also offer any product survey report related to the Portable Formaldehyde Detector industry chain. First, for industry structure analysis, the Smart Formaldehyde Detector industry is concentrate. New Cosmos-Bie and RIKEN KEIKI account for about 66.41% of the revenue market. Regionally, North America is the biggest production area of Smart Formaldehyde Detector, also the leader in the whole Smart Formaldehyde Detector industry. Second, the production of smart formaldehyde detector increases from 92006 Units in 2011 to 173129 Units in 2016, with an average growth rate of more than 14.70%. Third, Japan occupied 32.77% of the revenue market in 2015. It is followed by China and United States, which respectively have around 24.87% and 23.97% of the global total industry. Other countries have a small amount of production. Geographically, Japan was the largest consumption value market in the world, which took about 30.76% of the global in 2015. China shared 25.95% of global total. Fourth, for price trend analysis, a key variable in the performance of Smart Formaldehyde Detector producers is raw material costs, specifically the speed at which any increase

can be passed through to customers. Fifth, for forecast, the global Smart Formaldehyde Detector revenue would keep increasing with annual growth rate with 8~10%, and a little higher speed in China. We tend to believe that this industry still has a bright future, considering the current demand of Smart Formaldehyde Detector. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.
