The global Smartphone Cover Glass market was valued at 145.98 Million USD in 2021 and will grow with a CAGR of 1.22% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Smartphone Cover Glass is usually aluminum silicate material. With screen sizes increasing, smartphones continue to lead total area demand in the cover glass market; however, as the markets for smartphones and tablets mature, cover glass industry revenue growth is declining from 39 percent year over year in 2013 to around 10 percent in 2017. While the overall cover glass market growth is falling, increasing popularity of the Apple Watch is leading to growth in smart watch cover glass shipments. In 2017, total shipments of smartphone cover glass was 35241 k sqm, The global market for smartphone cover glass will grow at a steady rate during the forecast period and will post an impressive CAGR of over 2.55% by 2023. The recent increase in the shipment of cover glass due to the growing population of mobile devices across the globe is a noteworthy factor that will impel the prospect for market growth until the end of the forecast period. Furthermore, factors such as the rapid growth of high-performance displays will also result in the high growth of this market over the forecast period. In terms of consumption, the APAC region is predicted to be the largest downstream market for smartphone cover glass. The prospects for growth in this market segment will be driven by the rising demand for smartphones, especially from regions

like China and Southeast Asia. It was reported that over 80% smartphones are manufactured and assembled in China. Also, the augmented utilization of e-commerce portals coupled with greater internet penetration will aid in the growth of this market in APAC.
