A snow blower or snow thrower is a machine for removing snow from an area where it is not wanted, such as a driveway, sidewalk, roadway, railroad track, ice rink, runway, or houses. The term 'snow thrower' is often used to encompass snow throwers and snow blowers, however, in proper a snow thrower is a machine that uses a single stage to remove or 'throw' snow while a snowblower uses two stages to remove or 'blow' snow. It can use either 7?HP?12 power (line power or battery), or a HP?7oline or diesel engine to throw snow to another location or into a truck to be hauled away. This is in contrast with the action of snow plows, which push snow to the front or side. In the coming years there is an increasing demand for snow thrower in the regions of North America and Europe that is expected to drive the market for more advanced snow thrower. Increasing of household used fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of snow thrower will drive growth in United States and Europe markets. Globally, the snow thrower industry market is not concentrated as the manufacturing technology of snow thrower is relatively matures than some high-tech equipment. And some enterprises, like Husqvarna, John Deere, MTD etc. are well-known for the

wonderful performance of their snow thrower and related services. At the same time, North America, occupied 48.21% sales market share in 2016, is remarkable in the global snow thrower industry because of their market share and technology status of snow thrower.
