## Abstracts

The global Sodium Hydrosulfide market was valued at 185.12 Million USD in 2021 and will grow with a CAGR of 3.66% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Sodium hydrosulfide is a chemical compound that is represented using the formula NaHS, which can solute in water and alcohol. Usually, it is cubic crystal of orange or yellow and solution in the industry. Sodium hydrosulfide can be used for pulp and paper, copper flotation, chemical dye manufacturing, leather tanning and other fields. In this report we static the sodium hydrosulfide solid flakes which content usually over about 70%.First of all, with the development of economy, sodium sulfide has huge market potential in the future. Secondly, sodium hydroxide and hydrogen sulfide are the main raw materials for the production of sodium sulfide.Almost all sodium sulfide manufacturers are their own production of hydrogen sulfide, many manufacturers need to buy sodium hydroxide.With the development of sodium sulfide, raw material manufacturers also benefit from sodium sulfide industry to some extent. Third, manufacturers are concentrated in China. Shandong yiqi is the world`s largest manufacturer.The development of sodium sulfide industry in China is slow.The scale of sodium sulfide in India is growing rapidly. Fourth, sodium sulfide consumption is mainly concentrated in China.China is the world`s largest consumer market. Fifth, the industry is influenced by the economy and policies, so it is important to pay attention to

economic indicators and leaders' preferences. As the global economy recovers, more and more people will pay attention to the improvement of environmental standards, which will put some pressure on the industry. Sixth, due to the increased demand for sodium sulfide downstream products, the world sodium sulfide production capacity will continue to expand slightly in the next five years. Seventh, we tend to think that the industry is now approaching maturity and that consumption growth will plateau. In terms of product prices, the slow downward trend in the coming years will continue, and the price gap between different brands will narrow as competition intensifies. Similarly, the gross margin will also fluctuate.
