Abstracts

The global Sodium Hypochlorite market was valued at 1192.93 Million USD in 2021 and will grow with a CAGR of 1.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Sodium hypochlorite (NaOCl) is a compound that can be effectively used for water purification. It is used on a large scale for surface purification, bleaching, odor removal and water disinfection. The global 2010-2015 Fatty Amine price is in the first rising and later-decline trend, from about 110\$/MT in 2010 to 99\$/MT in 2015, with the future capacity growth and raw material changes, prices will be in decline trend. The global 2015 Fatty Amine Production will reach 13500 K MT from 12400K MT in 2010. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field. Although sales of Fatty Amine brought a lot of opportunity, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the Fatty Amine field.
