Sodium petroleum sulfonate is a black brown translucent liquid that soluble in water. It is extracted from petroleum oil fraction by sulfonation, alcohol water extraction and sodium salt saponification, and then refined finally. It is usually produced as a mixture of related sulfonates and mainly used as metalworking fluids, cutting fluid, hydraulic fluids. Through several months` investigation and analysis, the project team gets the following conclusions: First, Currently, the Sodium petroleum sulfonate is a low value-added industries, currently only a handful of companies in the production of this product, the global market concentration is high. Second, In the world wide, giant manufactures mainly distribute in China India and US. American has a long history and unshakable status in this industry as to technology, Sonneborn leading the industry to development. Third, all manufactures in the world are committed to the improvement of product. These two years, some Chinese manufactures can almost catch up with the world`s leading technology.
