Sodium Propionate is the sodium salt of propionic acid which has the chemical formula $\text{Na}(\text{C}_2\text{H}_5\text{COO})$. This white crystalline solid is deliquescent in moist air. Sodium propionate is an effective growth inhibitor of most molds and some bacteria. It is widely employed in bread and other bakery products to prevent mold and rope formation and to extend the normal shelf life. The Sodium Propionate industry is a relatively small market as food additives. Now, the Niacet has become a global leader with two production base in the US and the Netherlands. In China, the manufactures focus in Shandong province.
