Magnetic materials are important functional materials with wide application and various varieties. According to the application types, magnetic materials can be divided into soft magnetic materials and permanent magnetic materials. Soft magnetic material is a kind of magnetic material with low coercivity and high permeability. It is easy to magnetize and demagnetize. Its main function is to transfer and transmit electromagnetic energy, which is widely used in various power conversion equipment. Soft magnetic materials mainly include metal soft magnetic materials, ferrite soft magnetic materials and other soft magnetic materials. According to types, the most proportion of the Soft Magnetic Materials is Soft Ferrites Materials, taking about 80% share of global market in 2019. The most proportion of Soft Magnetic Materials is used for Communication and the proportion is about 30% in 2019. China is the major consumption region of the global market, which takes about 36% market share.
