The global Solar Cell (Photovoltaic) Equipment market was valued at 4650.99 Million USD in 2021 and will grow with a CAGR of 1.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Solar Cell is a device made from crystalline silicon or thin film that converts sunlight into electricity by a process known as the photovoltaic effect. There are two key indicators for solar cells: one is cell conversion efficiency, and the other is cell thickness. Solar Cell (Photovoltaic) Equipment mainly refers to the solar module in photovoltaic industry. Solar module employs light energy (photons) from the sun to generate electricity through the photovoltaic effect. Most of modules use wafer-based crystalline silicon cells or thin-film cells based on cadmium telluride (CdTe) or copper indium gallium selenide (CIGS). The structural (load carrying) member of a module can either be the top layer or the back layer. Cells must also be protected from mechanical damage and moisture. Most solar modules are rigid, but semi-flexible ones are available, based on thin-film cells. In this report, the statistical product is considered from the solar module, the statistical data is considered from the shipment volume. This report mainly covers the Solar Modules product type (Single Crystal Silicon, Polycrystalline Silicon and Other). Recently, consumption of Solar Cell (Photovoltaic) Equipment changed from Europe to China, USA and Japan. In 2015, consumption of Solar Cell (Photovoltaic) Equipment is about 34 GW for China, USA and Japan. Moreover, the emerging

markets, such as India and Southeast Asia, Latin America also have increasing consumption in the past two years.
