The global Solar Street Lights market was valued at 286.74 Million USD in 2021 and will grow with a CAGR of 16.63% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Solar street lights are raised light sources which are powered by photovoltaic panels generally mounted on the lighting structure or integrated in the pole itself. The photovoltaic panels charge a rechargeable battery, which powers a fluorescent or LED lamp during the night. Asia Pacific was the largest revenue market with a market share of 35.56% in 2012 and 38.93% in 2017 with an increase of 3.37%. Middle East and Africa ranked the second market with the market share of 27.51% in 2016. Also, the Asia Pacific market for Solar Street Lights is expected to be the market with the most promising growth rate. Rising per capita income of people in emerging economies such as China, India, Philippines, Thailand, and Vietnam has led to an increase in demand. Solar Street Lights companies are mainly from Europe and United States, the industry concentrate rate is low. The top three companies are Philips, Tata Power Solar Systems, Jiawei, with the revenue market share of 6.31%, 3.04%, and 2.22% in 2016. The growth of the Solar Street Lights market is largely driven by downstream applications. What is more, governments of numerous countries are encouraging the adoption of solar street lighting as they are eco-friendly and cost-efficient. Advanced solar street lighting systems save significant energy. Although sales of Solar Street

Lights brought some opportunities, the study group recommends the new entrants who has not technical advantage and downstream support do not enter into the Solar Street Lights field. As large demand of high-end products at home and abroad, many companies began to enter the field of high-end. What is more, the company in this industry should pay attention to their R&D, innovation and services, then they may get the competition advantage, and get a bigger market share.
