The global Solid-State LiDAR market was valued at 795.85 Million USD in 2021 and will grow with a CAGR of 10.88% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Solid state LiDAR is gaining traction as a promising technology that is cheaper, faster, and provides higher resolution than traditional LiDAR, with predictions that its price range could eventually hundreds of dollars per unit. Globally, some enterprises, like Velodyne, Quanergy, LeddarTech, etc. are well-known for the wonderful performance of their Solid-State LiDAR and related services. At the same time, Europe, will be occupied 48% sales market share in 2021, is remarkable in the global Solid-State LiDAR industry because of their market share and technology status of Solid-State LiDAR. The consumption volume of Solid-State LiDAR is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Solid-State LiDAR industry may not keep that fast.
