## Abstracts

The global Solvent Recycling market was valued at 820.92 Million USD in 2021 and will grow with a CAGR of 4.1% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Solvent recycling is the process of taking used, dirty solvents and cleaning them until the solvent is returned to its pure form or to any acceptable specification. Used solvents are placed in a solvent recycler and put through a process that fractionates and distills them from the chemicals that made them dirty those introduced to create a reaction with the solvent. Aside from the positive environmental impact from solvent recycling, a key benefit is cost reduction. Companies don't need to buy the same amount of solvent, because it can be recycled, and disposal fees are greatly reduced with less of the dirty solvent discarded. This can be true for any segment of industry that uses solvents, including laboratories, auto body shops, paint shops and paint contractors. In the solvent recycling market, there are three types of vendors. Some companies like Clean Planet Chemical, can offer recycling technology and provide recycling service, and customers are charged for the recycled solvent. The other type is that companies like IST Pure, mainly take selling solvent recycling machines as their key business. The third type is that companies like Maratek Environmental can both provide service and sell machines. Solvent recycling market has two types: 'providing solvent recycling service' and 'selling solvent recycling equipment'. According to that, there are three types of vendors. Some

companies like Clean Planet Chemical, can offer recycling technology and provide recycling service, and customers are charged for the recycled solvent. The other type is that companies like IST Pure, mainly take selling solvent recycling machines as their key business. The third type is that companies like Maratek Environmental can both provide service and sell machines.
