The global Sortation System market was valued at 4867.17 Million USD in 2021 and will grow with a CAGR of 7.1% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Sortation System is the machinery that according to the preset computer instruction to sorting of goods and delivering the goods to the specified location. Sortation System is similar to conveyors but typically having higher capacity and can divert containers more quickly. Typically used to distribute high volumes of small cartons to a large set of locations, automated sortation systems offer a highly accurate and efficient means of sorting, routing, consolidating, and diverting a wide range of parcel types to unique destinations for the purposes of order selection, processing, packaging, palletizing, storing, and shipping. The company's core companies are Dafu, SSI SCHAEFER, KION Group (Dematic), Vanderlande, BEUMER, Siemens, Intelligated, Fives intrgistics, Murata Machinery, TGW Group, Interroll, Mitsubishi Electric, Shanxi Oriental Materials Processing, Potevio, Equinox, Okura, etc. The global sorting system market continues to grow due to the increased accuracy and efficiency of the sorting system. However, high installation costs and high maintenance costs will hinder the market development of automated sorting systems. Despite the competition issue, investors are still optimistic about the field due to the obvious global recovery trend, and more new investments will enter the field in the future. Even so, market competition is still very

intense. The research team recommends that new entrants do not enter the field as long as they have money but no technical advantage and upstream and downstream support.
