The global Sound Level Meters market was valued at 11.47 Million USD in 2021 and will grow with a CAGR of 4.39% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Sound level meter or sound meter is an instrument that measures sound pressure level, commonly used in noise pollution studies for the quantification of different kinds of noise, especially for industrial, environmental and aircraft noise. First, as for the global sound level meters industry, the industry structure is relatively stable. The most of market share in revenue is grasped by the top four manufacturers, Brüel & Kjær, Cirrus, 3M and Norsonic, which closes to 55 per cent totally. The Denmark giant Brüel & Kjær, which has 22.03% market share in 2015, is the leader in the sound level meters industry. The manufacturers following Brüel & Kjær are 3M and Cirrus, which respectively has 14.08% and 9.88% market share globally. The Aihua is the leader of China sound level meters industry. It sold a total of 2.34 million dollar sound level meters products in the year of 2015. Second, the downstream industries of sound level meters products are factories and enterprises, environmental protection, transportation industry and scientific research field. In the recent years, with the recovery of global economic, the development of emerging countries and the growth of construction expense, the consumption increase of sound level meters will be obvious. In the foreseeable future, the sound level meters products will show an optimistic upward

trend. Finally, although sales of sound level meters products bring a lot of opportunities, the study group recommend the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the sound level meters field hastily.
