The global Spark Detection Systems market was valued at 191.71 Million USD in 2021 and will grow with a CAGR of 7.15% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A spark detector is a simple device which monitors the infrared light within the field of view of a special sensor which detects light in the infrared range. This light is emitted from all things which emanate heat, and sparks or burning embers emit a greater amount of infrared light in contrast to the surrounding area within a typical room, workshop or factory floor. Fire is also detectable by the spark detector, which means any deflagration event within the ductwork will be registered and abated by a properly designed fire extinguishment system. Europe is the largest market with nearly 30% market share, followed by North America and China. The spark detector industry has a low degree of concentration. The key players are Fagus-GreCon Greten, BS&B, Hansentek, Firefly, Control Logic, Flamex, Argus Fire Control, EWS, Atexon Oy, EDS Srl, Boss Products, Ampe Technology, Wuxi Yongan etc. The top three manufacturers occupied over 20% market share.
