Transformer in addition to the exchange of AC voltage conversion, there are other uses, such as changing the frequency of power supply, rectifier equipment, power supply, welding equipment, power supply or electric power transformer, current transformers and so on. These special-purpose transformers are known as special transformers. Because of the working conditions and load conditions of these transformers, they can not be calculated by the general transformer calculation method. There are companies adding new capacities and aims at the cost and quality leadership which shall improve profitability. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. The average price of Special Transformer will fall further. The product average price declined in the past few years due to the technology development, the average price will keep this trend in the few future years due to increasing mature manufacturing technology and cost of raw materials.
