Sponge cloths are made of a biodegradable and durable mixture of cellulose, cotton, and mirabilite ? a mineral salt that is washed out during the manufacturing process. The resulting cloth is extremely absorbent and so, so strong. It can absorb 20 times its weight in liquid, but easily wrings nearly bone dry, minimizing bacteria and mildew growth. and it's machine-washable up to 300 times ? which means that a single sponge cloth can replace up to 15 rolls of paper towels. At present, Europe and North America dominate the global sponge cloth market. Global leading companies include Kalle, 3M, Freudenberg Home and Cleaning Solutions, Spontex Industrial, Corazzi Fibre, Ramon Hygiene Products, etc. The main sales areas of Sponge Cloths are in Europe and the North America, which together account for over 70% of the global revenue market share in 2019.
