This report studies the Sponge Rubber market. Sponge Rubber refers to rubber that has been manufactured with a foaming agent to create an air-filled matrix structure. It is also called foam rubber, cellular rubber, expanded rubber or foam sponge rubber and so on. North America is the dominate producer of sponge rubber, the production was 1993701 Cubic Meters in 2017, accounting for about 24.35% of the total amount. China has the highest production growth rate of 2.07% from 2013 to 2018. A huge space for growth in the Chinese market exists, the quality and technology should be further improved. The industry concentration of sponge rubber is very low. There are many players around the world. The top five companies occupied about 10.38% production share of the market in 2017. Under the influence of raw materials, market competitions and economic conditions, the price of sponge rubber fluctuate from 2013 to 2018. As competition intensifies, prices gap between different brands will go narrowing.
