### Abstracts

The global Sports Nutrition market was valued at 286.08 Million USD in 2021 and will grow with a CAGR of 8.68% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Sports nutrition products include sports drinks, supplements, and food that include protein powders, Isotonic drink powder, capsule/tablets (creatine/branched chain amino acids and others), supplement powder, ready-to-drink protein drinks, carbohydrate drinks, protein bars, carbohydrate/energy bars and other supplements. The sports nutrition market is expected to witness significant growth within the forecast period on account of increasing demand from recently emerging lifestyle and recreational users. In addition, increasing health awareness coupled with increasing number of health clubs and fitness centers is also expected to boost this market within the forecast period. Rapid urbanization and increasing disposable income are also expected to boost growth in the sports nutrition market. The high number of cheap counterfeit products affects sales of reputed companies and therefore, availability of these products is expected to restrict the growth of sports nutrition market. Expansion of distribution channels is also expected to be an opportunity for growth in this market in coming years.
