Abstracts

The global Spray Gun market was valued at 116.15 Million USD in 2021 and will grow with a CAGR of 2.85% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Spray gun is a small, air-operated tool that sprays various media including ink and dye, but most often paint by a process of nebulization. Spray guns were developed from the airbrush and are still considered a type of airbrush. As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government's policy and the high sales of spray gun in the international market, the current demand for spray gun product is relatively stable in the mature market, such as North America and Europe, but the demand in China is relatively higher due to the downstream demand. Spray gun is mainly manufactured and sold by Finishing Brands, Exel, Graco and ANEST IWATA; and these companies occupied about 43.31% market share in 2016. Geographically, China is the largest sales market in the world, which took about 27.27 percent of the global consumption volume in 2016. But North America shared 31.19% of global total sales revenue. Although sales of spray gun brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the spray gun field hastily.
