## Abstracts

The global Stain Remover Products market was valued at 183.89 Million USD in 2021 and will grow with a CAGR of 2.85% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Stain remover products are available in various forms such as liquids, powders, bars, sprays, sticks, tablets, wipes, foams, gels, and packs. These products usually contain bleaches, surfactants, enzyme preservatives, fragrances, and coloring agents depending upon the type. The common stain types are mud, milk, soil, barbeque sauces, red wines, beetroot, coffee, coke, blood, honey, mayonnaise, baby food, honey, oil, and tomato sauce. Stains and spots on clothes can be removed if they are treated with the right products at the right time. Freshly occurred stains are usually easier to treat; thus, manufacturers are focusing on pre-laundry cloth treatment products which are portable, compact, and convenient to use. The stain remover keeps clothes fresh and soft for a longer period of time, thereby extending the clothes life. The major trends in this market include eco-friendly stain remover products and increasing demand from developing countries. The vendors of laundry care products are coming up with the green laundry concept with the usage of more biodegradable components in the product offerings. Some of the leading eco-friendly stain remover products are Attitude Eco-Friendly Laundry Stain Remover, Citra Spot Natural Stain and Odor Remover, Everyday Stain & Odor Eliminator, and 365 Pre-Wash Stain Remover.
