Stainless steel plate refers to steel plate those are resistant to atmospheric, steam, water, acid, alkali, salt and other corrosion medium. According to the organization structure and chemical composition, stainless steel plate can be divided into martensitic stainless steel plate, ferritic stainless steel plate, austenitic stainless steel plate, duplex (ferritic-austenitic) stainless steels plate, precipitation-hardening stainless steel plate. Due to the serious overcapacity and demand growth tend to be slow; the gross margin of steel industry has declined at a very low level as well as the gross margin of stainless steel plate industry. Though China government has published supporting policy in order to increase China local demand, its serious overcapacity can not be digested. It is forecasted the development of steel industry in the future is still not good.
