The global Steam Boiler System market was valued at 3565.98 Million USD in 2021 and will grow with a CAGR of 1.4% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Steam boiler or simply a boiler is basically a closed vessel into which water is heated until the water is converted into steam at required pressure. Steam boilers are used where steam and hot steam is needed. Hence, steam boilers are used as generators to produce electricity in the energy business. Boiler classification can be based on many factors like usage, fuel fired, fuel firing system, type of arrangement etc. Commonly known types are pulverized coal fired boilers, fluidized bed boilers, super critical boilers, oil and gas fired boilers. All cater to industrial and power generation. The Steam Boiler System industry demand is much supported from the demand in emerging economies like China and India, also from Gulf countries, where water pipe construction creates large demand. Demand from developed countries is quite stable, as the large construction period has already passed.
