The global Steel Roofing market was valued at 654.18 Million USD in 2021 and will grow with a CAGR of 5.24% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Steel roofing is a roofing system made from Steel pieces or tiles. Steel roofing can be a sensible way to protect home, especially if people live in an area that experiences a lot of storms, rapid temperature changes, beaming sun that melts asphalt, large hail, or heavy snowfall. The global Steel Roofing industry is characterized by several large international manufactures and many smaller regional and local manufactures. Therefore, market share concentration is low. The two largest operators account for about 8.8% of total industry revenue in 2017, most manufactures operate locally and provide services to a small segment of the population. Nonetheless, market share has increased over the past five years because a number of companies were acquired during the recession. Larger companies are looking to expand their footprint in nearby areas, where they can add value and turn once-struggling operations into profitable ventures. Key market players include CertainTeed Roofing, Tata Steel Europe, NCI Building Systems, Kingspan Group, BlueScope Steel Limited, and Fletcher Building among others. North America Steel Roofing's market size was valued at around USD 2806.9 million in 2017. Europe is expected to exceed USD 2097.7 million by 2018, at a CAGR of over 5.18% from 2013 to 2018. Asia-Pacific is estimated to be the third largest

market for Steel Roofing in 2017, with China expected to lead the market in terms of growth rate from 2013 to 2018. China Steel Roofing market size is expected to reach US\$ 820.4 million by 2018, with a CAGR of 4.77 % over the period 2013 to 2018.
