Strain Gauges, also called Strain Gages, are devices whose resistance changes under the application of force or strain. They can be used for measurement of force, strain, stress, pressure, displacement, acceleration etc.The global average price of Strain Gauges is in the decreasing trend, from 665 USD/K Pcs in 2012 to 631 USD/ K Pcs in 2016. With the situation of global economy, prices will be in decreasing trend in the following five years. China is the largest consumption region of Strain Gauges, with a sales market share nearly 37% in 2016. North America is the second largest consumption region of Strain Gauges, enjoying production market share nearly 15.91% in 2016. Strain Gauges demand has a certain space, but technical threshold is low, so the market is scattered. However, high end products concentrated in a small number of companies. Although production of Strain Gauges brought a lot of opportunities, the study group recommends the new entrants just having money but without downstream support do not enter into the Strain Gauges field abruptly.
