The global Super Absorbent Pet Pad market is extremely competitive, where several vendors compete in terms of product differentiation, product portfolios, quality, and pricing. Many vendors in the market are extending their businesses to emerging markets such as Central and South America, and APAC. The intense competition prevailing in the market will lead to consolidation among market vendors in the coming years. The growing demand for pet food that is grain-free, organic, natural, and with low-glycemic content are gaining popularity among pet owners, which has pushed the

manufacturers to formulate new products to meet consumer requirements. The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin. The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Market stays in mature period with a clear concentration. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins. Manufacturers can take advantage of this situation by reinforcing their production units and supply-chains to avoid any delay in production turn-around-times (TAT) and supply-lead-times. Significant and lasting barriers make entry into this market difficult. These barriers include, but are not limited to: (i) product development costs; (ii) capital requirements; (iii) intellectual property rights; (iv) regulatory requirement; and (v) Transitions` unfair methods of competition. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive .The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.
