Super tough nylon is an impact modified crystalline thermoplastic polyamide resin. The defining super tough nylon characteristic is superior resistance to repeated impact loads. This material maintains good tensile strength, chemical resistance, stiffness and flexural memory. They are for injection molding and extrusion and they offer outstanding impact resistance over a wide temperature and humidity range and high productivity. There are few manufactures in the global. In global market, the production of super tough nylon increases from 2100 MT in 2011 to 2605 MT in 2016, at a CAGR of more than 4.39%. In 2016, the global super tough nylon market is led by Europe, capturing about 34% of global super tough nylon production. USA is the second-largest region-wise market with 27.12% global production share.
