The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Synchronous Reluctance Motor (SynRM) is a special type of AC synchronous motor. It generates torque on the principle, which any un-magnetised magnetic material will try to align itself along the path of least magnetic reluctance path. The stator uses projected poles also like the rotor; hence SRM is also known as doubly salient machine. The classification of Synchronous Reluctance Motor (SynRM) includes 0-30 KW, 30-100 KW, and Above 100 KW. Synchronous Reluctance Motor (SynRM) is widely used for Process Industries, Discrete Industries and Transportation.
