## Abstracts

The global Tablet Rotary Presses market was valued at 42.93 Million USD in 2021 and will grow with a CAGR of 3.17% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Tablet Rotary Presses market. There are 2 types of tablet presses: single-punch and rotary tablet presses. Most high speed tablet presses take the form of a rotating turret that holds any number of punches and dies. As they rotate around the turret, the punches come into contact with cams which control the vertical position of each punch. Tablets produced by a rotary tablet press are compressed into uniform size, shape and weight making it the preferred machine for large-scale manufacture as it also produces more tablets than single punch machines. In the coming years there is an increasing demand for tablet rotary presses in the regions of North America and Europe that is expected to drive the market for more advanced tablet rotary presses. Increasing of pharmaceutical fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of tablet rotary presses in developing countries will drive growth in global market. Globally, the tablet rotary presses industry market is low concentrated as the manufacturing technology of tablet rotary presses is relatively matures than some high-tech equipment. And some enterprises, like Fette?Leit?, KORSCH, Romaco and Manesty(Bosch), etc.

are well-known for the wonderful performance of their tablet rotary presses and related services. At the same time, China, occupied 41.54% production market share in 2017, is remarkable in the global tablet rotary presses industry because of their market share of tablet rotary presses. The consumption volume of tablet rotary presses is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of tablet rotary presses industry may not keep that fast. But it is surely forecasted that the market of tablet rotary presses is still promising.
