A static VAR compensator (SVC) is a set of electrical devices for providing fast-acting reactive power on high-voltage electricity transmission networks. SVCs are part of the Flexible AC transmission system device family, regulating voltage, power factor, harmonics and stabilizing the system. A static VAR compensator has no significant moving parts (other than internal switchgear). Prior to the invention of the SVC, power factor compensation was the preserve of large rotating machines such as synchronous condensers or switched capacitor banks. TCR Static Var Compensator (SVC) is a kind of SVC. In Chinese market, TCR Type Static VAR Compensator key players include NR Electric, Rongxin Power Electronic, Taikai Power Electronic, Liaoning Lide Investment Holding Group, CRERT, etc. The top five manufacturers hold a share over 40%. North China and South China is the largest market, both with a share over 25%. In terms of product, Voltage Between 30kV and 40kV is the largest segment, with a share about 50%. And in terms of application, the largest application is Electrified Wire Netting, followed by Metallurgy & Steel.
