The global Temperature Monitoring market was valued at 720.02 Million USD in 2021 and will grow with a CAGR of 4.28% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A temperature sensor collects temperature data and displays in a human-understandable format. These sensors are of two types, contact temperature sensors and non-contact temperature sensors. Industries, automotive, Consumer Electronics and the medical sector are some of the key industries using these temperature sensors. Emerson, Sensata and Amphenol captured the top three production value share spots in the Temperature Monitoring market in 2016. Emerson dominated with 5.68% production value share, followed by Sensata with 3.74% production value share and Amphenol with 3.62% production value share. In the next five years, the global consumption of Temperature Monitoring will show upward tendency further, revenue is expected in 2022 will be 9603.50 Million USD. The global automotive temperature sensors market size is expected to grow to USD 3391.65 Million by 2022. The increasing demand for safe and better automotive vehicles that are compliant with environmental regulations is driving the demand for temperature sensors. Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems. Although sales of Temperature

Monitoring brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this market
