The global Thermal Barrier Coatings market was valued at 106.41 Million USD in 2021 and will grow with a CAGR of 4.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Thermal barrier coatings (TBC) are highly advanced materials systems usually applied to metallic surfaces, such as on gas turbine or aero-engine parts, operating at elevated temperatures, as a form of exhaust heat management. TBCs are characterised by their very low thermal conductivity, the coating bearing a large temperature gradient when exposed to heat flow. The most commonly applied TBC material is yttria stabilized zirconia (YSZ). This resulted in increased demand for aero-engines and turbines, which further resulted in increased demand for the product. This is expected to be a key trend in the industry during the projected years. Growing adopting of the product in defense and marine application is also expected to propel growth within next years. On the basis of region, North America is the largest market segment of Thermal Barrier Coatings, with a consumption market share nearly 33.21% in 2016, followed by Europe with a consumption market share nearly 31.29% in 2016. Asia is expected to witness the highest growth during the forecast period in the industry, especially China, which has great market potential in the future with a consumption market share nearly 9.57% in 2016. Thermal Barrier Coatings used in industry including Aerospace, Automotive, Military and Power, etc. Report data showed that 33.84% of the Thermal Barrier

Coatings market demand in Aerospace in 2016, which dominated the Thermal Barrier Coatings market.
