The global Thermocouple Wire market was valued at 947.74 Million USD in 2021 and will grow with a CAGR of 4.4% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A thermocouple is a sensor for measuring temperature that consists of two dissimilar metals that are joined together at the sensing end. Different thermocouple types (e.g. J, K, T, E, etc) use different mixtures of metals in the wire. At the cjc (cold junction compensation) end, the millivolt value provided by the thermocouple represents the difference in temperature of the sensing end as compared to the cjc end (also called the reference end). Alternatively, a thermocouple wire is a temperature-measuring instrument consisting of two wires of different metals joined at each end. One junction is placed where the temperature is to be measured, and the other is kept at a constant lower (reference) temperature. A measuring instrument is connected in the electrical circuit. The temperature difference causes the development of an electromotive force (EMF) that is approximately proportional to the difference between the temperatures of the two junctions. Temperature can be read from standard tables, or the instrument can be calibrated to display temperature directly. There are many manufacturers which sell Thermocouple Wire. TE Wire, Cable, Johnson Matthey, Heraeus, Sandvik (Kanthal), BASF, OMEGA Engineering, Belden, Pelican Wire, National Instruments, Indutrade (Pentronic), Pyromation, etc. are large companies in the market of Thermocouple Wires.

TE Wire?Cable is global leading for sale of Thermocouple Wire, which makes up 4.71% market share in terms of revenue in 2018. Nowadays, global Thermocouple Wire sales areas are mainly in North America, Europe, Asia-Pacific. In 2018, Asia-Pacific Thermocouple Wire sales takes about 31.62% with 263.41 M USD and it is the largest sales region. Asia Pacific was a major market for Thermocouple Wire in 2018 and is estimated to expand due to the rising number of industries.
