Abstracts

The global Thermoplastic Prepreg market was valued at 6.9 Million USD in 2021 and will grow with a CAGR of 6.9% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Thermoplastic prepregs are composite reinforcements (fiberglass, carbon fiber, aramid, etc.) that are pre-impregnated with thermoplastic resin. Common resins for thermoplastic prepregs include PP, PET, PE, PPS, and PEEK. Thermoplastic prepregs can be provided in unidirectional tape, or in fabrics that are woven or stitched. Global thermoplastic prepreg consumption market, by geography is segmented into Europe, North America, Asia-Pacific, South America, Middle East, and Africa. North America and Europe belong to the larger producers, which together account for more than 61.8% of global consumption in 2016. As for top sales revenue countries, Europe accounted 32.67% of global thermoplastic prepreg sales income in 2016, while North America ranked second position with about 30.68 % share. There are mainly three types of thermoplastic prepreg in the market: glass fiber, carbon fiber and aramid fiber. Glass fiber type is cheap. Glass fiber type accounted 40.98% global market share in 2016. Thermoplastic prepreg has a large market around the world. The thermoplastic prepreg industry will develop stably in the future, especially in the developing countries. Business distribution channels are the avenues a business uses to sell or deliver its product or service. Distribution channels for sellers of products include brick-and-mortar

stores, online stores, direct mail solicitations, catalogs, sales reps, wholesalers, distributors and direct response advertising. Service providers don't offer something a consumer can touch, feel and put in a bag, so if you're selling a service, you must figure out additional ways to deliver it.
