The global Thermoset Resin Composites market was valued at 8996.59 Million USD in 2021 and will grow with a CAGR of 2.33% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A thermosetting resin is a prepolymer in a soft solid or viscous state that changes irreversibly into an infusible, insoluble polymer network by curing. Polymer materials may be categorized in a number of comparative ways. Common categories include natural versus synthetic and oil-resistant versus non-oil-resistant. APAC is estimated to contribute the highest revenue share of the thermoset resin composites market during the forecast period. The growth of the market in this region is mainly driven by the increasing need for lightweight vehicles. Developing regions such as China and India are the leading countries in terms of consumption of resin composites in the automobile industry. Moreover, the growth in consumer goods and electronic industries is also driving the growth of this thermoset resin market in APAC.
