The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Titanium Tetrachloride, also titanium tetrachloride, is the inorganic compound with the formula $TiCl_4$. It is a colorless liquid with a penetrating odor. Titanium tetrachloride does not exist naturally in the environment but is man-made using minerals that contain high levels of titanium. Titanium tetrachloride ($TiCl_4$) is used mainly in the chemical industry as an intermediate in the production of titanium dioxide and titanium metal in the form of sponge or powders. $TiCl_4$ is also used in the manufacture of catalysts and as a glass and metal surface treatment. Because of its hazard potential, $TiCl_4$ is handled under strictly controlled conditions. The industry's leading producers are Chemours, Tronox and Venator, with revenues of 27.51%, 21.11% and 5.86% respectively in 2019.
