Resveratrol is a phenolic compound, a stilbene, created by plants in response to injury, infection, and fungal attack. It exists in two forms, the trans- and cis- molecule forms, with trans-resveratrol being the highly-absorbable form. The compound is regarded as having powerful antioxidant effects, thereby supporting health at the cellular level. Trans-resveratrol is one of the isomers (molecule structures) of resveratrol, with cis-resveratrol being the other. Simply put, trans-resveratrol occurs with hydroxide atoms on opposite sides of the molecule, where cis- resveratrol has the hydroxide atoms on the same side. The global Trans Resveratrol industry has a rather high concentration. The major manufacturers are concentrated in China, Europe and North America, such as DSM, JF-NATURAL, Great Forest Biomedical, Shaanxi Ciyuan Biotech and Chengdu Yazhong. At present, DSM is the world leader, holding 17.56% production market share in 2017. In 2017, the global Trans Resveratrol consumption market is led by North America and North America is the largest region consumption market, accounting for about 46.39% of global consumption of Trans Resveratrol. Trans Resveratrol downstream is wide and recently Trans Resveratrol has acquired increasing significance in various fields of Dietary Supplement, Cosmetic, Food and Beverage and others. Globally, the Trans

Resveratrol market is mainly driven by growing demand for Dietary Supplement and Cosmetic.
