## Abstracts

The global Trichloroisocyanuric Acid market was valued at 2632.34 Million USD in 2021 and will grow with a CAGR of 8.59% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Trichloroisocyanuric acid is a kind of organic compound. It is a white crystalline powder or granular solid, and has a strong chlorine pungent taste. Trichloroisocyanuric acid is easy to decompose in acid or alkali. Trichloroisocyanuric acid bactericidal performance is excellent. It becomes the new generation of broad spectrum, high efficiency, and low toxicity fungicides, bleach and shrink agent. The consumption regions concentrate on China and North America market, which shares about 53 percent of the global consumption in past five years. However, because of the limited of native policy, the production of North America is less than the consumption. Then the import volume is higher than the production of North America. Then the product price of North America and Europe is obviously higher than that of China.
