Trichlorosilane (Abbreviated: TCS) is an inorganic compound with the formula HSiCl_3 . Trichlorosilane is a chemical compound made up of silicon, hydrogen and chlorine. It is the primary raw material used in the manufacture of polycrystalline silicon metal for the semiconductor and solar cell industries. It is also sold directly to semiconductor customers for use in their processes. China is the largest consumption country of trichlorosilane (TCS) in the world in the past few years and it will keep the same position in the next few years. The Chinese market took up about 42% the global market in 2015, followed by USA (21.6%), Europe and Korea are closely followed with the share about 26%.
