The global Trimethylaluminum market was valued at 11.17 Million USD in 2021 and will grow with a CAGR of 9.73% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Trimethylaluminium is one of the simplest examples of an organoaluminium compound. Despite its name it has the formula  $Al_2(CH_3)_6$  (abbreviated as  $Al_2Me_6$  or TMA), as it exists as a dimer. This colorless liquid is an industrially important compound but must be handled with care due to its pyrophoricity; it evolves white smoke (aluminium oxides) when the vapor is released into the air. The top 9 manufacturers held about 82.62% of the market share in 2019.
