As to the global market of wind towers, tubular steel wind towers are taking more than 95% of the market share compared with the rest taken by frame towers and concrete towers. Meanwhile in China where the landforms are quite complex, wind towers in a large power range are still needed. The biggest participators in wind energy Vestas and Siemens, just finished a great many of offshore wind farm projects in Europe over the first half of 2015, at the same time China and US added loads of wind farms with large scale wind turbines (lots offshore wind farms under construction). Moreover, the global wind power installed capacity will create a new annual record regarding the huge added amount in the first half of 2015 in China (10GW). There is no doubt the average size of wind turbines will increase faster than ever before, which may bring more challenges and opportunities to tower manufacturers to provide more robust towers.
