The global Unattended Ground Sensor market was valued at 1513.65 Million USD in 2021 and will grow with a CAGR of 5.16% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The UGS (Unattended Ground Sensor) systems employ various sensor modalities including seismic, acoustic, magnetic, and pyroelectric transducers, daylight imagers and passive infrared imagers to automatically detect the presence of persons or vehicles, and transmit activity reports or imagery via radio-frequency (RF) or satellite communications (SATCOM) links to a remote processing, exploitation, and dissemination (PED) station. The systems are packaged for concealed emplacement in the field and for long-duration unattended operation. Harris accounted for 14.30% of the Global Unattended Ground Sensor revenue market share in 2015. Other players accounted for 13.19%, 9.91% including Northrop Grumman and ARA. Global giant manufactures mainly distributed in USA and Europe. They have unshakable status in this field. The key product markets locate at USA and Europe. USA takes the market share of 55.91% in 2015, Europe and China followed by with 18.34% and 10.63% in 2015. The market is not only influenced by the price, but also influenced by the product performance. The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market. Looking to

the future years, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin. Despite the presence of competition problems, due to the Global recovery trend is slightly, investors are still optimistic about this area; the future will still have more new investment enter the field.
