Abstracts

The global Unsaturated Polyester Resins (UPR) market was valued at 809.75 Million USD in 2021 and will grow with a CAGR of 8.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the unsaturated polyester resins market, from angles of players, regions, product types and end industries, to analyze the status and the future. Unsaturated polyester resin is produced first by esterificating diacid and diol to polymer form, then using styrene monomer to dissolve polymer into syrup form resin creating unsaturated polyester resin, this is what we called UPR. The advantages of UPR are easy blending with filler and create excellent properties under room temperature with normal pressure. After applying pressure with heat, UPR can be formed into high hardness products with excellent mechanical properties. UPR has distinct properties in weather resistance, chemical resistance, water resistance and cold resistance. UPR is widely used in soft mold casting, button, boards, artificial marble, furniture, corrugated roofing, storage tanks, pipe line, yachts, fishing rods and many other construction FRP materials. Due to abundant raw material resource and mature technology, there are many suppliers all over the world. The market is fragmented on a global level with the top four companies accounting for less than 25% of the market in 2017. Key global participants in the market include Ashland, DSM, Polynt-Reichhold and Yabang. During them, Polynt-Reichhold is the global leader. During past five years, global UPR

consumption had varied from 4253.1 K MT in 2013 to 5028.8 K MT in 2017, with a CAGR of 4.28%. In 2017, the largest consuming region was Asia, followed by North America and Europe; China was the largest consuming country, with 44.05% of the total.
