Abstracts

The global UV Adhesives market was valued at 790.89 Million USD in 2021 and will grow with a CAGR of 5.02% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Increasing aging population and innovation in medical procedures are expected to lead to increased demand for medical devices, such as IV delivery systems, catheters, syringes, hearing aids, silicone rubber components, among others. Since UV adhesives are increasingly being used in the manufacturing of these devices, the rise in the demand of the devices is expected to consequently lead to the growth of UV adhesives.
