Abstracts

The global Vacuum Skin Packaging market was valued at 1145.61 Million USD in 2021 and will grow with a CAGR of 7.49% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Vacuum Skin Packaging (VSP) is an outstanding solution for extending the shelf life of perishable food products, including fresh and processed meats, poultry and seafood, ready-to-eat meals, fresh produce and cheese. The shelf life of a VSP package is nearly double that of a traditional MAP package, and close to four times longer than a stretch-wrapped product. Everyone benefits from longer shelf life: retailers will reduce their shrink, consumers will reduce their food waste. The materials used to do VSP are PET, PE, PP, EPS etc. The industry's leading producers are Sealed Air, Amcor (Bemis) and Winpak Ltd., with revenues of 23.91%, 15.67% and 8.43% respectively in 2019. By region, North America has the highest share of income, at more than 43 percent.
