Abstracts

The global Vegan Food market was valued at 112.36 Million USD in 2021 and will grow with a CAGR of 5.71% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Vegan Food is a type of vegetarian diet that excludes meat, eggs, dairy products and all other animal-derived ingredients. Many vegans also excludes foods that are processed using animal products, such as refined white sugar and some wines. Growing awareness about animal health and animal cruelty in the food industry has been encouraging people to shift from animal-based to plant-based food products. Increasing awareness about the benefits of following vegan diet is the key factor responsible for the growth of this market.
