HPMC Capsules are two-piece capsules made from cellulosic raw materials that satisfy vegetarian, religion, cultural and policy needs. These vegetable capsules are an attractive, all natural dosage form that retain all the advantages - easy to swallow, effectively mask taste and odor, and allow product visibility. These capsules are also starch-free, gluten-free and preservative-free, and meet the strict dietary needs of customers that choose a vegetarian lifestyle. HPMC (Hydroxypropyl methylcellulose) capsules have been developed for both Health Supplements products and Nutraceutical. Currently, the main type of soft vegetarian capsules is plant polysaccharides type, and empty vegetarian capsules is HPMC, Pulullan polysaccharide is still a type of conception according to our interview with Capsugel. The main application of softgel capsule is health supplements, but for HPMC capsule, it is pharmaceutical industry. The vegetarian capsules can divided into two products, i.e. softgels and empty capsules, the softgels price is relatively high and the empty one is lower. The price of softgel capsules is followed a declined trend. While the HPMC products is much stable, and get a slight upturn, though its price is the lowest in the all types of vegetarian capsules.
